As to claim 2, disclosed is an applications content configuration module coupled to said application content mapping module (detailed description).

As to claim 3, disclosed is an extensible module capable of including predefined data descriptors.

Art Unit: 3644

As to claim 4, disclosed is data formatting logic (paragraph [0047]).

As to claim 5, disclosed is pre defined tag information (product identifiers).

As to claim 6, disclosed is compliance with XML.

As to claim 7, disclosed is the mapping logic for automatically mapping index information of said first data format into said tag information of said second data format (detailed description).

As to claim 8, disclosed is the applications content configuration module is capable of being and executable text file.

As to claim 9, disclosed is the XML compliant with the OBI

As to claim 10, disclosed is the client capable of being a wireless personal computer system.

As to claim 11, disclosed is a sever coupled to said XML content mapper; a plurality of goods and services catalog residing in a database in said server, each of said catalogs comprising unique goods and services identification parameters; a XML content translator and a document exchange framework module coupled to said content mapper (Detailed Description).

Art Unit: 3644

As to claims 12-25, the system and method as disclosed in the instant application is considered to be anticipated as readily apparent by the teachings of Rivera et al.
